

WEEKLY INTERNSHIP REPORT

Name of Student: Ephrem Tilahun

Student ID No: 0094/13

Mentor's Name: Mr. Bekele M.

Department: Software Engineering

To be filled out by the department:

Submission date: _____

Accepted by mentor: _____

(Date, full name and signature)

Comments:

Abstract.

In week 3 of my internship, the focus shifted to advanced web development techniques with an emphasis on styling frameworks and JavaScript. The week began with an introduction to Bootstrap, followed by a Tailwind CSS Crash Course. I found Tailwind CSS to be particularly compelling due to its utility-first approach, which offers greater flexibility and customization compared to Bootstrap's predefined components. This week also included a progress update webinar, reviewing advancements made in the previous week. The latter part of the week was dedicated to JavaScript basics, including DOM manipulation with in-depth sessions on interacting with the Document Object Model. Another webinar provided insights into using JavaScript for creating interactive user interfaces, tying together the concepts of JavaScript and DOM manipulation for enhanced web functionality.

Week No: **Three** Dates: **July 22 2024 to July 28 2024**

Day	Weekday	Activities
In your Company		
	Monday	<ul style="list-style-type: none">● Bootstrap Intro● Tailwind CSS Crash Course:

	Tuesday	<ul style="list-style-type: none"> ● WEBINAR: Update of week 2 Progress
	Wednesday	<ul style="list-style-type: none"> ● JS Basics: ● JS DOM Basics
	Thursday	<ul style="list-style-type: none"> ● WEBINAR: JavaScript for Interactive UI
	Friday	JS DOM Manipulation In depth
By your own		
	Saturday	<ul style="list-style-type: none"> ● Working on Min task
	Sunday	<ul style="list-style-type: none"> ● Working on Min task
